## WHO WE ARE:

**DRIZORO S.A.** is a Spanish company with more than thirty years of experience as manufacturer of chemical products for the building industry, focused on the specialty of waterproofing mortars, protective and repair mortars for concrete structures, decorative and protective coatings for façades and flooring systems. From our Headquarters and Production Centre, localized in Torrejón of Ardoz (Madrid), all works carried out for the different departments are directed: Production, Research & Development and Laboratory, Technical, Commercial, Marketing and Management.

## DRIZORO AROUND THE WORLD

**DRIZORO S.A.** has an International Division that offers a permanent contact and technical assistance to its customers with presence in more than thirty countries and in the five continents. At present, the company is developing an expansion process for new markets.

## TECHNICAL ASSISTANCE

Technical Department, composed of engineers and architects with wide experience in the building industry, gives professional advice at the different phases for a project: consideration, design or under construction. This technical assistance includes the evaluation, the diagnoses and the recommendation of the most suitable system as well as the control during the application of the material and the result. This assistance is given at any time and anywhere in the world by request.

In addition, training courses are imparted to technical professionals, applicators and distributors in order to provide a correct recommendation and application for the products and proposed systems. These courses are carried out both in headquarter and in company.

## COMMITMENT WITH THE QUALITY AND THE ENVIRONMENT

The commitment with the continuous improvement of products and manufacture procedures, taking into account the most advanced technology, have led to us the implantation of an Integrated Quality and Environment Management System, which is based on the ISO 9001:2000 and ISO 14001:2004 standards. This is a stimulus for the whole personnel of the company, and it makes us to approach the present and future with enthusiasm and professionalism.

**APPLICATION FIELDS**

**WATERPROOFING**

Cement-based systems, hydraulic mortars and water-reactive injections resins from **DRIZORO** solve many problems in both the water-retaining structures and the bellow-grade structures around the world and every day.

**REPAIR AND RESTORATION**

For the repair and restoration of damaged structures. A wide range of special mortars and products is available. In addition, in order to increase the load capacity of concrete elements, **DRIZORO** has a strengthening system based on carbon fibre technology.

**PROTECTION AND DECORATION**

To provide the most suitable decorative finishing in order to protect substrates from both chemical and weathering attack, **DRIZORO** put a wide range of coatings for flooring systems and façades at the most demanding clients.
